European Union's hypocrisy about sanctions against Russia

The World Federation of Trade Unions expresses its opposition to the European Union's yesterday's decision to prolong economic sanctions against Russia.

The European Union, NATO and the USA are faking when they claim that these measures will allegedly promote peace.

The sanctions are the expression of the rivalries between the USA-NATO-UE on the one hand and Russia on the other.

The workers of Russia and the workers of the countries of the very European Union are the ones who pay the negative consequences.

-We demand the end of the sanctions.

-We demand that NATO stop filling Eastern Europe and the Baltic region with military bases and war weapons. NATO must be dissolved.
